

I am Carrie-Anne Olson and an MYP5 student. I would tell my pre-COVID 19 self to enjoy living/being in the US as much as possible while I was still there, because you will probably be unable to travel and see your family and old friends for a long time. This obviously also stands for not taking any traveling to any countries for granted as well. Enjoy going out more, such as shopping or just going into bigger cities. Also invest in good books and stock in Zoom, and don't stress about getting into DP. I give permission for this to be on the ISG website.
